Editing the templates

Access the Canva editing guide below.

[CANVA GUIDE](#)

Website Setup

Step 1: Creating the Links for the Deliverables

- Edit the Sacred Self-Care Templates in Canva, as desired.
- When finished all of your editing, download the pages as a PDF.
- Next, upload the PDF to your favorite cloud storage service — [Google Drive](#), [Dropbox](#), [Box](#), etc.
- The MP3 files can also be uploaded to these platforms.
- Then, generate a public file-sharing URL.
- Do this for each template (or MP3s) that you want to include.
- Go to your **Canva Thank you page template**.
- Select the button you want to link.
- With the button selected, right-click and then select “Link” from the options or the icon that looks like a chain.
- Paste your file link into the URL field.
- Save and Publish.

Step 2: Creating Your Payment Link

To create your payment link, follow the guides below.

- PayPal: Use this guide to set up your payment link: [How to Create a PayPal Payment Link](#)
- Stripe: Follow these instructions to generate a payment link: [Stripe Payment Links Guide](#)
- When you're creating your payment links, enter your Thank you page URL for the Auto-Return/Confirmation/After Payment URL
- Save the payment link.

Once your payment link is ready, copy it to your clipboard.

Step 3: Add the Payment Link to your Buttons on Canva

- Go to your Canva website.
- Add the payment links to the buttons as done previously
- Save and Publish.

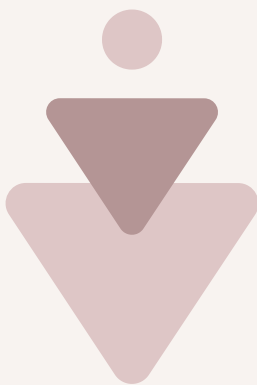

**** After adding the links, visit the pages and click the buttons to ensure they work.*

Beacons Setup

Step 1: Complete Step 1 Above

Step 2: Upload the Website to Beacons

- Open the Beacons template in Canva.
- Personalize the content: Swap out the text, images, and graphics as desired.
- You can remove the buttons as they are not needed in Beacons.
- Download the image as a JPG file instead of a PNG to keep the file size small enough.
- If the image size is too large when saving from Canva, consider reducing the size to around 0.70 or a similar value.
